Eureka Dunes Rare Plant Survey

Do you like plants, science, hiking, backcountry camping,
and amazing scenery?

If you answered yes, yes, yes, yes, and yes, then we want your help!

Three amazingly resilient rare plant species call Eureka Dunes home, and we need help from
volunteers to collect data on their presence.

Preferred commitment of 4 consecutive days/3 nights (Mon-Thurs)
one of the following weeks:

March 20-23 March 27-30 April 3-6 April 10-13

Preferred that volunteers are able to supply own tent & camping equipment; Highly preferred that volunteers are able to travel to Eureka Dunes in own vehicle (4WD/high clearance vehicle needed). Survey will necessitate 10+ miles of strenuous, exposed hiking per day. Will train on plant ID and use of GPS equipment.

Email deva_volunteer@nps.gov to sign up in advance, ages 15 and up only, please.

Project is limited to 10 participants per week.
