

<b>Scientific Name</b>	<b>Common Name and description</b>	<b>Number as of 8/7/2012</b>
<p><b><i>Achillea millefolium</i></b></p> 	<p><b>Yarrow</b> Easy, will spread at a reasonable rate. About 1" high, white flowers. Wants some water. Perennial flower</p>	19 tree pots
<p><b><i>Achnatherum speciosum</i> <i>Stipa speciosa</i></b></p> 	<p><b>Desert needlegrass</b> A low growing bunchgrass about 1 foot tall. Reseeds itself easily and spreads. The silvery seeds in June backlit by afternoon sun are beautiful. It looks good in groups and you will have a lot of them in a few years with its reseeding qualities.</p>	21 tree pots
<p><b><i>Anemopsis californica</i></b></p> 	<p><b>Yerba mansa</b> A beautiful white coneflower. Likes water so plant near a stream or water a lot. Spreads by rhizomes. Dies back in fall but the big fleshy leaves come back in the spring. The dry leaves have a lovely odor.</p>	4 gallons 19 tree pots
<p><b><i>Angelica lineariloba</i></b></p> 	<p><b>Soda Straw</b> Parts of this plant are poisonous. It flowers in mid summer and grows to be 24-48" tall. Attracts bees, butterflies and birds. It needs full to partial sun and regular water, but don't overwater.</p>	12 gallons
<p><b><i>Aquilegia formosa</i></b></p> 	<p><b>Crimson columbine</b> Pretty-red/yellow flowers once in spring/early summer. A perennial flower. Part to full shade. Wants water-either a watered garden or by a creek. Will reseed, but not too weedy. About 1-2' tall. This will bloom its second year</p>	40 tree pots

<p><b><i>Arabis pulchra</i></b></p> 	<p><b>Beautiful rockcress</b> A 3 foot tall perennial with purple flowers. It likes full sun. It is a lot like wallflower but with purple flowers.</p>	<p>1 gallons 3 tree pots</p>
<p><b><i>Artemisia tridentata</i></b></p> 	<p><b>Great Basin Sagebrush</b> An evergray shrub 4 feet tall and wide. Its form is stately and it stands out in a landscaping situation. It is a nitrogen fixing plant. Needs full sun and good drainage, very drought tolerant.</p>	<p>4 tree pots</p>
<p><b><i>Asclepias speciosa</i></b></p> 	<p><b>Broad leaf milkweed</b> Easy and invasive! Don't plant this where you don't want it to spread. Very pretty in bloom and into the fall and winter. Needs very little water, the more water, the faster it spreads. Full sun. About 3' tall and as wide as you let it spread. Butterflies like it.</p>	
<p><b><i>Astragalus coccineus</i></b></p> 	<p><b>Scarlet milkvetch</b> Often grows by itself on open, sunny flats or banks. Grows close to the ground about 1 foot high. The seedpods are 1 to 1 1/2 inches long and are plump and furry. Found on gravelly or sandy banks, between rocks in the sagebrush. Is found up to 6500 feet.</p>	
<p><b><i>Astragalus lentiginosus</i></b></p> 	<p><b>Paper locoweed</b> Has a stunning rose-purple flowers with white tips. The plant can be sprawling or bushy. The seedpods are papery and inflated. They are usually mottled red or purplish. Likes gravel soil and full sun. Is found between 4,000 and 8,000 feet.</p>	<p>13 tree pots</p>
<p><b><i>Astragalus newberryi</i></b></p>  <p>Christopher Christie photo</p>	<p><b>Newberry's milkvetch</b> Produces flowers that are pink-purple in color. It flowers between April and June. It likes gravelly soil and grows between 4300 and 7700 feet.</p>	

<p><b><i>Astragalus purshii</i></b></p> 	<p><b>Wollypod locoweed</b> Is a ground hugging plant that can spread and cover a slope. Likes dry, sandy or gravelly habitat. Can grow from the Mojave to timberline. The 1-inch flowers are pink-purple and the white seedpods resemble cotton balls.</p>	<p>15 tree pots</p>
<p><b><i>Atriplex canescens</i></b></p> 	<p><b>Four-wing salt bush</b> A shrub that grows to 5 feet. Needs full sun and well-drained soil. It is a good bird plant. If you are planting in rabbit or deer habitat. Cage the plant until it is 3-4 ft. high.</p>	
<p><b><i>Balsamorhiza sagittata</i></b></p>  <p>1995 Saint Mary's college of California</p>	<p><b>Balsamroot</b> Is a perennial that grows to about 18 inches high. Is easily confused with Mules Ears. The flowers grow on 1-2' stems and are 3" across. The basal leaves are arrow shaped. It blooms early in the summer. It likes to grow on dry open hillsides and meadows. Is found up to 8500 feet.</p>	
<p><b><i>Betula occidentalis</i></b></p> 	<p><b>Water birch</b> Likes moist situations. Grows to 20 feet, with many trunks. Has beautiful fall foliage and smooth reddish bark.</p>	<p>9 gallons 1 tree pot</p>
<p><b><i>Calystegia longipes</i></b></p> 	<p><b>Desert morning glory</b> A vine that likes dry, rocky places. It has showy flowers that are cream to pale pink. Grows to about 1 foot high and wants full sun.</p>	<p>9 tree pots</p>
<p><b><i>Castilleja applegatei</i></b></p> 	<p><b>Indian paintbrush</b> Although most paintbrush are hemi-parasites, which means they need to live with their host plants, applegatei is one of the varieties that can grow alone. It like full sun and well drained soil.</p>	

<p><b><i>Ceanothus greggi</i></b></p> 	<p><b>Desert ceanothus</b> A shrub that grows to 6' tall. The clusters of white flowers exude a sweet fragrance. Plant in full sun and well-drained soil. Water in spring and fall but not in summer!</p>	
<p><b><i>Ceanothus leucodermis</i></b></p> 	<p><b>Chaparral Whitethorn</b> A shrub that grows 8 ft. tall and 6 ft. wide. It has white bark and azure blue flowers, which cover the plant in spring. Plant in full sun and well-drained soil. Water in spring and fall but not in summer!</p>	
<p><b><i>Cercocarpus ledifolius</i></b></p> 	<p><b>Mountain mahogany</b> Extremely slow going evergreen that will eventually get quite large so give it room. Easy care, water monthly on the valley floor. Likes well drained soil. Full sun to part shade. Needs no pruning and very little care. A great evergreen for around here</p>	12 gallons
<p><b><i>Chamaebatiaria millefolium</i></b></p> 	<p><b>Fern bush</b> Has an aromatic herbage and a pretty white flower. Likes full sun and good drainage.</p>	8 gallons
<p><b><i>Chilopsis linearis</i></b></p> 	<p><b>Desert willow</b> is a large deciduous tree. Can grow to 20 feet- so give it room. Its leaves look like a willow and the flowers like an azalea. It is the last tree to leaf out but will flower until frost. Hummingbirds love it.</p>	15 gallons
<p><b><i>Chrysolepsis sempervirens</i></b></p> 	<p><b>Bush chinquapin</b> A beautiful evergreen shrub with leathery green leaves on the topside and a golden yellow underside. Likes gravelly soil and full sun. Is found up to 9500'</p>	

<p><b><i>Clematis ligusticifolia</i></b></p> 	<p><b>Virgin's bower</b> Likes full sun and regular water. It spreads along the roots so gets a little "weedy" but looks nice on a fence or arbor.</p>	<p>3 gallons 31 tree pots</p>
<p><b><i>Cryptantha confertiflora</i></b></p> 	<p><b>Golden forget-me-not</b> Has beautiful yellow flowers, blooms in June. Likes dry rocky soils and full sun.</p>	<p>6 gallons 1 tree pots</p>
<p><b><i>Datura wrightii</i></b></p> 	<p><b>Jimson weed</b> Gets really big, 2 feet high by 2 feet wide by 3 feet long. Dies back completely in the fall. Likes the alkali soil of the valley floor and needs very little water. The seeds are poisonous.</p>	<p>31 tree pots</p>
<p><b><i>Delphinium parishii</i></b></p> 	<p><b>Desert larkspur</b> Cardinal blue flower found in dry rocky areas. Likes full sun and well-drained soil.</p>	
<p><b><i>Encelia actoni</i></b></p> 	<p><b>Bush sunflower</b> Beautiful round shaped bush with long stemmed flowers. They like full blazing sun. and very well-drained soil. A nice perennial I think they may be a short lived plant that reseeds itself easily.</p>	<p>40 tree pots 1 gallon</p>
<p><b><i>Ephedra nevadensis</i></b></p> 	<p><b>Nevada ephedra</b> A bluer green than <i>Epedra viridis</i>. If you get the female plant, it can have lots of small yellow flowers in the spring. This plant is used for its evergreen vertical foliage. I see it as the juniper for the Eastside.</p>	<p>3 gallons</p>

<p><b><i>Ephedra viridis</i></b></p> 	<p><b>Green ephedra</b> A beautiful bush with a strong vertical evergreen presence. A nice background plant for the garden. Likes full sun and well-drained soil.</p>	
<p><b><i>Ericameria cooperi</i></b></p> 	<p><b>Cooper's Goldenbush</b> A nice shaped domed bush that grows about a foot high. In June it is covered with little yellow flowers. Likes full sun and well-drained soil.</p>	<p>3 gallons 8 tree pots</p>
<p><b><i>Eriogonum elatum</i></b></p> 	<p><b>Tall buckwheat</b> This plant has low-growing wide leaves. Throws up a 3 foot flower stalk that will have bunches of small white flowers typical to buckwheats. It is very hardy. Likes full sun and well-drained soil.</p>	<p>5 gallons</p>
<p><b><i>Eriogonum fasciculatum</i></b></p> 	<p><b>California buckwheat</b> A small shrub with white flowers. Likes well-drained soil and very little water. Its flowers, leaves and seeds are all used by butterflies and small birds. White flowers come on in late spring, gradually turn pink in summer, then rust colored in fall. Flowers stay on until the next fall.</p>	<p>5 tree pots</p>
<p><b><i>Eriogonum nudum</i></b></p> 	<p><b>Nude buckwheat</b> A slender spike of white, pink or yellow flowers. This plant has a 3 inch (6 cm) base of small leaves from which it grows up into a 3 to 6 foot stem with small flower clusters near the top. It attracts bees, needs full sun and good drainage.</p>	
<p><b><i>Eriogonum umbelatum</i></b></p> 	<p><b>Sulphur buckwheat</b> Has yellow flowers, grey foliage. Sulphur Buckwheat needs good drainage to the point of living in gravel. It's very drought tolerant but best with a little water.</p>	<p>10 gallons 8 tree pots</p>

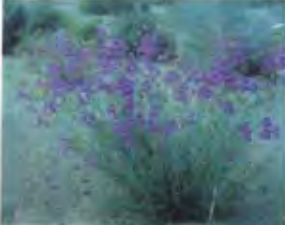

<p><b><i>Eriogonum wrightii</i></b></p>  <p>Dan Shimmom, 2011</p>	<p><b>Wright's buckwheat</b> Is a low growing form with slender pale pink flowers from higher elevations. The buckwheats are very important butterfly plants .</p>	<p>4 gallons</p>
<p><b><i>Forestiera pubescens</i></b></p> 	<p><b>Desert Olive</b> A beautiful tree that can grow to 10 feet. It has attractive fruit that the birds like. It likes to grow along the stream banks and canyons in the valley. Likes full sun and good drainage.</p>	<p>4 tree pots</p>
<p><b><i>Grayia spinosa</i></b></p> 	<p><b>Spiney hopsage</b> Is a common shrub of the high desert that can grow to 5 feet. The leaves are gray-tipped and the stems end in whitish, spine tips twigs. This plant's flower has no petals but bracts, which can be either rosy pink or a whitish cream. It flowers from April to July. It is an evergreen</p>	
<p><b><i>Helianthus nuttallii</i></b></p> 	<p><b>Nuttall's sunflower</b> A beautiful and very tall flower - about 8 foot stalks. Has yellow flowers that bloom in August. It likes full sun and needs occasional deep watering.</p>	<p>25 tree pots</p>
<p><b><i>Hesperostipa comata</i></b></p>  <p>Robert Sivinski photo</p>	<p><b>Needle and thread grass</b> <b>A beautiful bunch grass with seed heads with long bracts that dance in the wind.</b> Grows about 3 feet tall. The narrow inflorescence can get up to 11 inches long. It grows in grasslands and pine forests. Protect it from hungry rabbits.</p>	<p>10 tree pots</p>
<p><b><i>Iris missouriensis</i></b></p> 	<p><b>Blue Flag Iris</b> Each 1-2' stem bears 1-2 flowers. The grass like leaves reach as high as the flowers. Found in grazed fields because livestock doesn't eat it. Likes damp, grassy fields and will grow to 10,000 feet. It spreads by rhizomes and blooms May to July.</p>	<p>4 tree pots</p>

<p><b><i>Krascheninnikovia lanata</i></b></p> 	<p><b>Winterfat</b> This has an unexciting flower, but when in full bloom gives the illusion that it is glowing. It is a beautiful dome shaped bush. It makes a nice gray-green backdrop in your garden. An important graze plant for wildlife in the winter.</p>	<p>30 gallons</p>
<p><b><i>Lepidium fremontii</i></b></p> 	<p><b>Desert alyssum</b> Is an one foot perennial. It needs perfect drainage and full sun. The fragrant white flowers are on a plant that resembles a large garden alyssum. Desert Alyssum an excellent border plant for desert gardens. Full sun, good drainage; summer dormant.</p>	
<p><b><i>Leymus cinereus</i></b></p> 	<p><b>Great basin wild rye</b> One of the easiest of the desert grasses to grow. Does well with regular watering or less. Likes well-drained soil and full sun. The first grass to get growing in spring. Grows to 3 feet tall. Nice golden seeds in fall. Doesn't seem to self seed itself all over the yard.</p>	<p>50 tree pots</p>
<p><b><i>Linum lewsi</i></b></p> 	<p><b>Blue flax</b> Grows about a foot high. Blooms in early June. The flowers open in the morning. It will reseed itself and spread. Will tolerate watering.</p>	
<p><b><i>Lupinus excubitus</i></b></p> 	<p><b>Inyo bush lupine</b> A little tricky, but worth it. If it lives, it will be around for years as a perennial. Gorgeous purple/white flower spikes in spring. Well-drained soil and some water, but too much will rot it.</p>	<p>9 gallons</p>
<p><b><i>Lupinus magnificus</i></b></p> 	<p><b>Panamint mountain lupine</b> Is a perennial that can reach up to 4 feet in height. Its flowers are lavender to rose in color and bloom May through June. It likes washes and gravelly soil. It is found from 4900 to 8200 feet.</p>	

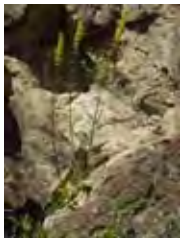

<p><b><i>Lupinus argenteus</i></b></p>  <p>2009 Barry Brackling</p>	<p><b>Silver lupine</b>  A little tricky, but worth it. If it lives, it will be around for years as a perennial. Gorgeous purple/white flower spikes in spring. Well-drained soil and some water, but too much will rot it. Grows in the montane forest and sage scrub.</p>	<p>2 gallons</p>
<p><b><i>Malacothamnus fremontii</i></b></p> 	<p><b>Bush mallow</b>  Flowers are pink on very fuzzy foliage. Spreads by suckers. Flower spikes are about 2-3 feet tall. Likes full sun, well drained soil.</p>	
<p><b><i>Mentzelia laevicaulis</i></b></p>  <p>2008 lara hartley</p>	<p><b>Blazing star</b>  Is a flashy yellow flower that can grow up to 6inches across. The flowers occur only at the tips of the branches and main stem. It likes gravelly well-drained soil. It is found in elevations from 5,000 to 9,000 feet.</p>	<p>9 tree pots  1 gallons</p>
<p><b><i>Mirabilis alipes</i></b></p> 	<p><b>Rose four-o'clock</b>  Produces magenta or cream colored flowers. The plant can grow to 15 inches tall and 31 inches. wide. Mirabilis likes to grow on dry gravel slopes and it will tolerate partial shade.</p>	
<p><b><i>Mirabilis multiflora</i></b></p>  <p>2003 Charles E. Jones</p>	<p><b>Large four-o'clock</b>  Can grow 15 inches tall and 6 feet wide. It opens its blooms in the afternoon and keeps its flowers most of the summer. Is tolerant of most soils. Plant it where it will get plenty of heat and sun. Once established, this plant needs no extra water. Butterflies like it.</p>	
<p><b><i>Monardella linoides</i></b></p> 	<p><b>Flax leaf mountain balm</b>  Flaxleaf Monardella, is a mounding perennial that grows in gravelly soil that is wet in winter and dry in summer. It is a delicate-leaved, lemon scented mint. It likes morning sun and afternoon shade. Flowers are a light pink and attract lots of butterflies.</p>	<p>45 tree pots</p>

<p><b><i>Monardella odoratissima</i></b></p> 	<p><b>Mountain pennyroyal</b>          Pretty light purple flowers in early summer. Low growing-about 10" tall and wide. Nice peppermint fragrance. Wants well drained soil, some water okay, but pretty tough. Full sun to partial shade.</p>	
<p><b><i>Oenothera caespitosa ssp. marginata</i></b></p> 	<p><b>Large white evening primrose</b>          A short-lived perennial. It has white-pink 3" flowers that fade to pink. The 12" leaves are from base only. The delightful fragrance is from the flowers. It needs regwater with good drainage. Protect from deer unless you like stumps.</p>	<p>14 tree pots          1 gallon</p>
<p><b><i>Oenothera californica ssp. avita</i></b></p> 	<p><b>White desert primrose</b>          Clumps 3 ft. by 10 feet across of 2 inch pink-white flowers are common. Really pretty flush of white flowers in late spring. Small and compact plant about 1' high and across. They like really well drained soil or they will rot out.</p>	<p>4 gallons</p>
<p><b><i>Oenothera elata</i></b></p> 	<p><b>Tall evening primrose</b>          This plant can grow to 5 feet in height. The flowers open in the evening and wilt by the next morning. It likes moist soil but can become weedy as it self seeds easily. The seeds of this plant were an important food source for the local Paiutes.</p>	<p>3 tree pots</p>
<p><b><i>Oenothera xylocarpa</i></b></p> 	<p><b>Woody fruited evening primrose</b>          It has showy yellow flowers in small rosettes. It needs full sun, good drainage and regular water.</p>	
<p><b><i>Oryzopsis hymenoides</i></b></p> 	<p><b>Indian Rice Grass</b>          Grows 4 to 24 inches tall and up to 24 inches wild. Can grow in partial shade and is tolerant of other soils but prefers sandy soil. . It is and important food for wildlife. It has been cultivated in Montana under the trade name "Montina" as a gluten-free grain.</p>	

<p><b><i>Penstemon eatonii</i></b></p> 	<p><b>Firecracker penstemon</b>  Easy, seems to be long lived for a penstemon. Likes some water during the summer, but don't let the base of the plant stay wet or it will rot. Fairly tolerant and very nice show of red blooms in spring.</p>	<p>44 tree pots</p>
<p><b><i>Penstemon floridus</i></b></p> 	<p><b>Rose penstemon</b>  Beautiful tall flower spike about 2 feet tall. Likes sandy well-drained soil. If you overwater it, it will look great for a year and then rot out. Attracts hummingbirds.</p>	<p>40 tree pots</p>
<p><b><i>Penstemon fruticiformis</i></b></p> 	<p><b>Death Valley beardtongue.</b>  A beautiful shrub with grey foliage. Fragrant white snapdragon like flowers. Needs full sun and very good drainage and occasional water</p>	<p>30 tree pot</p>
<p><b><i>Penstemon incertus</i></b></p> 	<p><b>Western desert penstemon</b>  A showy sky blue perennial that has 2 feet of light green (with a little silver) foliage with 2 foot spikes of blue above it. Needs full sun and good drainage.</p>	<p>14 gallons  74 tree pots</p>
<p><b><i>Penstemon monoensis</i></b></p> 	<p><b>Mono penstemon</b>  This penstemon has pink to red-violet flowers. It likes gravelly washes and hills so give it full sun and good drianage.</p>	
<p><b><i>Penstemon rostriflorus</i></b></p>  <p>2003 Christopher Christie</p>	<p><b>Scarlet penstemon</b>  When in bloom you can hardly see the stems for the flowers! This is a hardy penstemon that will last many years, as long as you don't water it too much. Likes dry soil and full sun.</p>	

<p><b><i>Penstemon speciosus</i></b></p> 	<p><b>Showy penstemon</b> A 2' perennial with 1-2" sky blue flowers, May-July. Do not water after the first summer in all sites but the desert.</p>	
<p><b><i>Phoenicaulis cheiranthoides</i></b></p> 	<p><b>Dagger pod</b> The gray green leaves give rise to 2-8 inch stems which produce many 1/4 inch flower clusters. It is one of the first to bloom in the spring. Dagger pod likes rocky well drained soil.</p>	1 gallon
<p><b><i>Phlox stansburyi</i></b></p> 	<p><b>Cold desert phlox</b> The 4-12 inch stems are woody at the base and usually sprout from horizontal underground stems, giving the appearance of a rounded shrub. White, rose and pink flowers can all be on the same bush. Likes open sandy slopes and grows up to 10,000 feet.</p>	1 tree pot
<p><b><i>Populus tremuloides</i></b></p> 	<p><b>Aspen</b> A tree that grows to about 15 feet. Has pretty green leaves in summer which turn a vibrant yellow to orange in fall. It likes to be in a regularly watered spot.</p>	2 very large pot (\$20)
<p><b><i>Prunus andersonii</i></b></p> 	<p><b>Desert peach</b> A deciduous shrub that grows to 3-6 feet. It has rose flowers in early spring. It likes sun, dry conditions, and good drainage. It has a beautiful flower show. It spreads by rhizomes so plant it where it can spread.</p>	12 gallons
<p><b><i>Psoralea argophylla</i></b></p> 	<p><b>Indigo bush</b> Seems to be happy in any well drained soil. Wants absolute full blazing sun, the hotter the better. Very little water while it gets established, then don't water it ever again! Blooms in mid spring with very pretty dark purple flowers. The odor of this plant is disagreeable to some people. Slow grower.</p>	5 gallons

<p><b><i>Purshia tridentata</i></b></p> 	<p><b>Antelope bitterbrush</b> An evergreen small-leaved shrub that grows to six feet. Give it full sun and dry conditions. You can prune it to shape it. In spring it is covered with small yellow flowers that smell great. A wonderful plant for the garden. You really can't kill it.</p>	<p>18 gallons</p>
<p><b><i>Rhamnus californica</i></b></p> 	<p><b>Coffee berry</b> An evergreen shrub that grows fast to 6-8 ft. Coffeeberry likes sun to part shade and has low water requirements. The berries turn red, then black. This plant is almost always deer proof.</p>	
<p><b><i>Ribes cereum</i></b></p> 	<p><b>Wax currant</b> A small-med shrub, deciduous. Nice red berries by late summer-good for birds. Full sun to partial shade. Wants some water. Spiny branches.</p>	<p>2 tree pots</p>
<p><b><i>Rudbeckia californica</i></b></p> 	<p><b>California coneflower</b> Likes meadows and riparian areas. It has showy long-lasting bright yellow flowers. Needs full sun to partial shade.</p>	
<p><b><i>Salazaria mexicana</i></b></p> 	<p><b>Bladder sage</b> Is a rather spiny 3-foot tall bush with 1 inch purple flowers. This plant grows on the valley floor. It is found in the open gravelly soils. Likes full sun and good drainage. Don't water it after it gets established.</p>	
<p><b><i>Salvia dorii</i></b></p> 	<p><b>Purple sage</b> Likes well-drained soil, full sun and a little water. Blooms in June with fun pagoda-like flowers. Attracts insects and has fragrant foliage.</p>	<p>15 tree pots</p>

<p><b><i>Solidago californica</i></b></p> 	<p><b>California goldenrod</b> A spectacular yellow flowered perennial that is very showy in the late summer and fall. It needs sun to partial shade. Plant in areas where the ground is wet in the spring and almost dry in the summer. Spreads from underground roots so give it room to grow</p>	<p>10 gallons 4 tree pots</p>
<p><b><i>Sambucus nigra ssp. cerulea</i></b></p> 	<p><b>Blue elderberry</b> This shrub grows about 5-6 ft. high. It has beautiful pinnately compound leaves and bears edible blue berries. It likes to grow in moist soil along stream banks and can tolerate some shade.</p>	<p>6 gallons</p>
<p><b><i>Schoenoplectus americanus</i></b></p> 	<p><b>Olney's Three square bulrush</b> Is a member of the sedge family and can grow to 6 feet in height. It spreads by rhizomes and forms dense root mats. If planted along a creek or pond it can keep the cattails from invading into the water. Native Americans use the cane for basket making.</p>	<p>6 gallons</p>
<p><b><i>Sphaeralcea ambigua</i></b></p> 	<p><b>Apricot mallow</b> Easy, wants some water in the summer. Likes well-drained soil. Nice flush of orange flowers early in the summer. Looks ragged by the fall so cut it back in the spring before new growth starts. Full sun is best. I water mine about once a week. Slowly spreads out to the sides. About 2' tall.</p>	<p>14 tree pots</p>
<p><b><i>Sporobolus airoides</i></b></p> 	<p><b>Alkali sacaton</b> A beautiful bunch grass that grows about 2.5 feet tall. Has delicate inflorescence. It is easy to grow, needs full sun and regular water. Slower to grow than Great Basin Wild Rye.</p>	<p>15 tree pots</p>
<p><b><i>Stanleya elata</i></b></p> 	<p><b>Prince's plume</b> Full sun and well-drained soil. Nice yellow spikes in the spring. Doesn't really need water, but a little will make it look better.</p>	<p>8 tree pots</p>

<p><b>Stanleya pinnata</b></p> 	<p><b>Desert plume</b> Full sun and well-drained soil. Nice yellow spikes in the spring. Doesn't really need water, but a little will make it look better. Blooms May through June and if you cut the spent flowers it will give you another bloom in fall.</p>	<p>53 tree pots</p>
<p><b>Wyethia mollis</b></p> 	<p><b>Mules ears</b> The leaves of Mule ears are covered with white hairs and the leaves are a gray green. This plant blooms a few weeks later than Balsamroot. It likes to grow in dry open slopes with sagebrush.</p>	
<p><b>Xylorhiza tortifolia</b></p> 	<p><b>Mojave aster</b> This has to be one of the prettiest flowers we get. They bloom in early spring. They like well-drained soil and very little water after they are established. They are dormant in the summer. Pollinators love them.</p>	
<p><b>Zauschneria californica</b></p> 	<p><b>Desert fuschia</b> This is a nice plant for fall flowers. It blooms late August until it freezes. Likes well-drained soil. It will tolerate regular watering, but containerize it or it will spread all over. Less water will help hold it in check. The hummingbirds like it.</p>	<p>48 tree pots</p>
<p><b>Opuntia basilaris</b></p> 	<p><b>Beavertail cactus</b> Plants form clumps 6 to 12 inches high and 1 to 6 feet in diameter. The red flowers are about 2 to 3 inches in diameter. It likes full sun and well drained soil, very little water.</p>	<p>5 cactus pots</p>
<p>Prices</p>	<p>Super Cells     \$2.00 or 3 for \$5.00 Tree pots         \$5.00 Gallons            \$8.00</p>
